

A REVOLUTION IN MICROWAVE BAKING & TOASTING

- Improved Food Quality
- Reduced Energy Costs
- Menu Versatility
- Increased Productivity
- On-Demand Cooking
- Replaces Baking Stones

The Silar[®] Microwave Flatstone

is an innovative ceramic composite microwave heatable oven insert that creates a new, easy way to speed-bake and toast a wide range of foods. Silar[®] changes the speed-quality baking paradigm, and introduces an entirely new technology: microwave-conduction baking. The Silar[®] Microwave Flatstone meets the restaurant market's demand for a lighter weight and lower cost product designed specifically to meet growing consumer eating trends and demands in the fast food and hospitality industries.

Silar[®] technology speed-bakes fresh and pre-made food items to perfection. Replace your baking stone with the Silar[®] Microwave Flatstone and reduce cook times by 15% - 20% with improved food quality. The Silar[®] Microwave Flatstone rises to target baking temperature in as little as five seconds, and can reduce bake time by up to 90%.

Easily cleaned, the oven insert is dishwasher safe and comes with a one-year guarantee. The Silar[®] Microwave Flatstone also allows restaurants options for menu expansion and versatility, servicing customers faster, and reducing labor and energy costs. Further, the Silar[®] Microwave Flatstone is compatible with all commercial microwave manufacturers.
