

A REVOLUTION IN MICROWAVE COOKING

- Improved Food Quality
- Reduced Energy Costs
- Menu Versatility
- Increased Productivity
- On-Demand Cooking

The Silar[®] Microwave Grill

is an innovative ceramic composite microwave heatable oven insert that revolutionizes commercial microwave cooking. Silar[®] changes the speed-quality cooking paradigm, and provides higher quality foods cooked even faster. The Silar[®] Microwave Grill gives professional kitchens the ability to cook with incredible speed and quality. Prior to the advent of the Silar[®] Microwave Grill, if you wanted food cooked and prepared quickly, you likely had to compromise on quality.

Silar[®] enables microwave-conduction cooking, allowing foods to cook both on the top and the underside evenly and uniformly. The Silar[®] Microwave Grill rises to cooking temperatures in as little as five seconds, and can reduce overall cook times by up to 90%.

Easily cleaned, the oven insert is dishwasher safe and comes with a one-year guarantee. The Silar[®] Microwave Grill also allows restaurants options for menu expansion and versatility, servicing customers faster, and reducing labor and energy costs. Further, the Silar[®] Microwave Grill is compatible with all commercial microwave manufacturers.
